ABOUT

Senior ML/AI Engineer with 5+ years building production systems (Generative AI, LLMs, Computer Vision, NLP). Led end-to-end ML solutions at Adobe (Enterprise Scale) and startups, delivering measurable impact: 27.5% efficiency gains, 24% engagement increases.
Available for remote opportunities worldwide (B2B or EOR).

TECHNICAL SKILLS

ML/AI: Deep Learning, LLMs (GPT, BERT, Llama), Transformers, NLP, Computer Vision, OCR, Recommender Systems, Predictive Modeling, RAG Systems, Prompt Engineering, Context Engineering, LLM Evaluation
Frameworks: PyTorch, TensorFlow, Hugging Face, LangChain, LangGraph, Scikit-learn, OpenCV
Languages & Tools: Python, SQL, Git, NumPy, Pandas
MLOps & Infrastructure: Kubernetes, Docker, MLflow, Ray (Serve/Train/Tune), AWS SageMaker, Azure ML, CI/CD
Cloud: AWS (S3, Lambda, SageMaker), Azure (ML Studio, Databricks)

WORK EXPERIENCE

QU SOLUTIONS | Lead ML Engineer | 2024.03 - Current, 1 year+

- Developed cross-platform mobile planner with adaptive AI models → 24% increase in user engagement through personalized coaching
- Led team to build agentic mobile health consultant app using LangGraph to reason over unstructured health data, facilitating 50+ early health alerts.
- Engineered mobile app using Computer Vision & OCR for perfume identification, boosting recommendation CTR by 13.5%

Team Leadership: Managed 2-3 ML engineers, owned full ML pipeline (data → model → deployment → monitoring)

Adobe | ML Engineer | 2023.03 - 2024.03, 1 year

KEY ACHIEVEMENT: Core ML library for Adobe Generative Fill (millions of users)

- Built production ML infrastructure improving image generation speed by 13.5%
- Designed GenAI & NLP architecture for QUVU Studio (virtual character platform)
- Led team of 3 ML engineers, established MLOps best practices
- Integrated ML models across Adobe ecosystem (Photoshop, Illustrator) → enabled low-latency real-time AI features. Optimized inference pipelines using model quantization and distillation to improve speed by 13.5%.

Impact: Enabled real-time image transformation for enterprise clients

TREEPLE AI | Data Scientist → ML Engineer | 2020.01 - 2023.01, 3 years

- Engineered route optimization + NLP models, reducing planning time by 27.5%
- Built multilingual NLP chatbot (real-time virtual guide) handled streaming responses for low-latency user interaction, +22% user satisfaction
- Developed recommendation systems increasing conversion by 12.2%
- Promoted from Data Scientist to ML Engineer after delivering 3 production systems as sole developer

EDUCATION

EURASIAN NATIONAL UNIVERSITY, Astana | Master | 2023-2025

- Artificial intelligence technologies

EURASIAN NATIONAL UNIVERSITY, Astana | Bachelor | 2019-2023

- Computer and Software Engineering
-
